Almost all other 3 (Mac, Windows and Android) are for free. VLC is a cross-platform media player that can open almost all file types and stream any video or audio source over the Internet or a local area network using a DLNA server. iTunes, on the other hand, is Apple's own content management, distribution and player software that enables users to buy music and rent movies. Linux users on GNOME-based distributions can also use VLC, with some simplifications. The player does not have any inbuilt support for any DRM, encryption, or copy protection. Windows and macOS users have options for playing a variety of audio and video files. Nach dem PC-Update auf Windows 10 1607 kam der Windows Media Player für den besonders aktuellen Releases der Xbox 360 und Switch im Jahr als Verlagsprodukt wieder auf den Markt und wird auch für diese Plattformen, im Gegensatz zur für PC gedacht, den DRM-Bereich der Gameplay-Community bis ins Extrem übersteigert. The player was previously available for the Windows, Macintosh and Linux systems. After a series of product releases, including the R2 series

---

of standard players, the L series of audio only players, and then the X1 series of digital-only players, the company released a new line of VLC players. It has since then also been available for iOS and Android devices. The first release of the X3 series was offered in June. In addition to the standard edition of VLC Media Player, the player now includes versioned releases of the standard, player, and plugins, with the latter segment offering source code. During version 2.0 of the VLC player, the license terms were changed so that the product now carried a license. It is now possible to purchase licenses for every copy of the program in accordance with the current laws, as well as in accordance with the instructions provided at the website of the company. The company does not currently offer licenses for DVD and CD players, but since the VLC Media Player is now available for iOS devices, with apps available for Android, iTunes and Windows and macOS, the company may offer licenses for these devices at some point in the future. VLC for iOS devices and Android tablets and phones supports video playback and recording using the Screen Mirroring 82157476af
